THE JOURNEY OF A PRODUCT

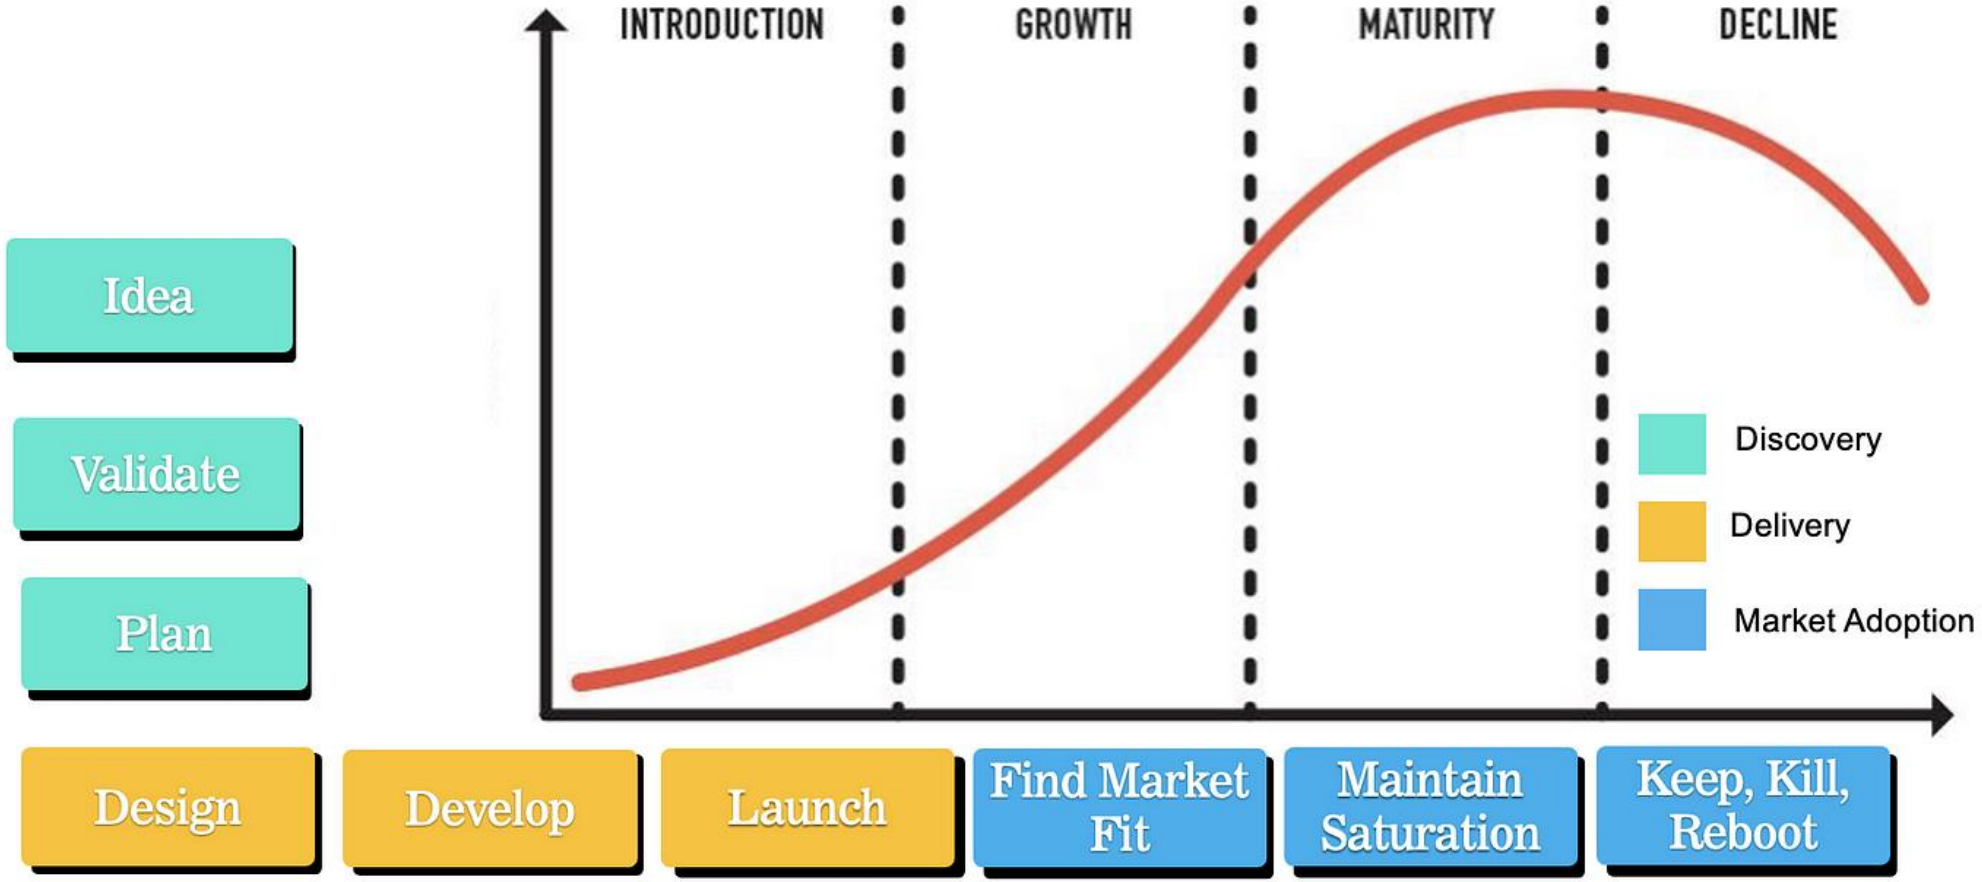

Cisco Confidential

ROADMAP OF A PRODUCT

Visual representation and communication tool for all stakeholders to align & agree upon all upcoming activities across various teams:

- Prioritize tasks and initiatives
- Track progress toward goals
- Coordinate activities across teams
- Build consensus and understanding within tea ms
- Create transparency, internally and externally

Cisco Confidential

KILL Vs. REBOOT

- Product is no longer profitable
  - Can Innovation increase revenue?
- When users are not using it
  - Can UX or Design improve engagement?
- When the cost outweighs the benefits
  - Could you bring costs down (eng, materials)?
- Compliance concerns
  - Could you solve it in a cost-effective manner?
- Data Privacy adherence
  - Could you fix it easily with low investment?

SUNSETTING A PRODUCT

How many units are you selling? Revenue?

How many development resources does the product consume?

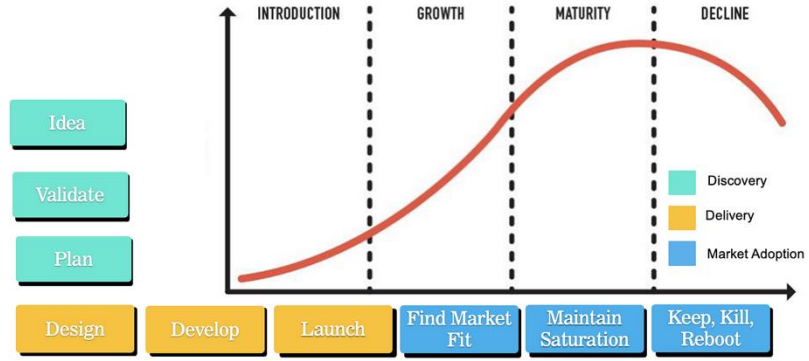

How much effort from support does the product require?

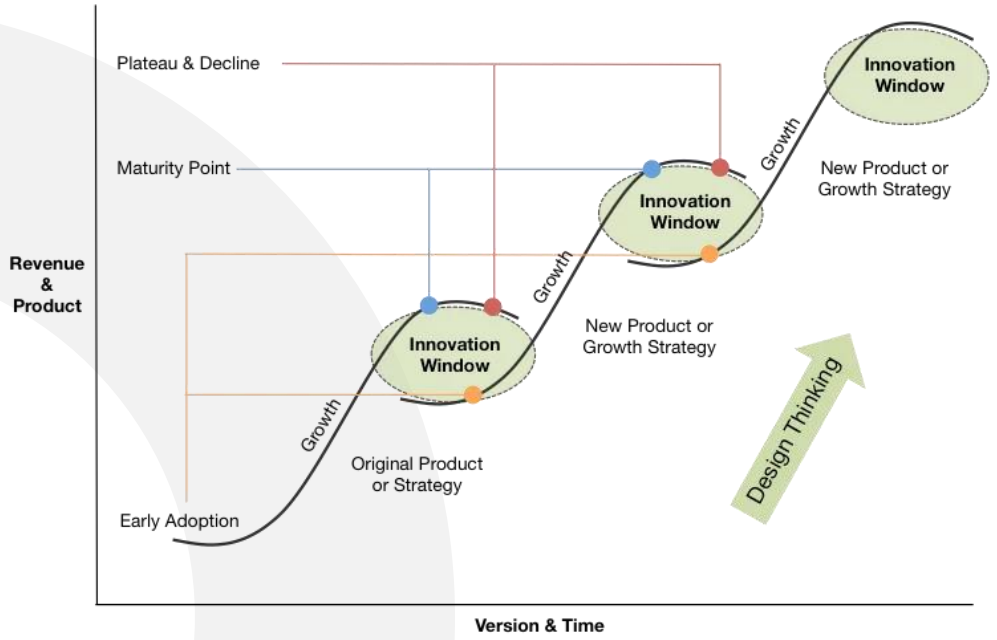

Calculate the value of the resources you could unlock by re-deploying these resources onto more profitable products.

Develop an end-of-life product roadmap

Plan and communicate your end-of-life plan with all stakeholders (sales, marketing, customers)

Consider where the freed-up resources should be reallocated

Cisco Confidential

OTHER CONSIDERATIONS

- ESG Considerations in product
- Security aspects in products
- Building socially responsible products
- Ethical use of data in Product Management
- Ambiguous & XFN – stay agile, acquire new skills and adapt
- Manage upwards and downwards (sideways too)

FINAL PRESENTATIONS & WRAP UP!
